# NEW LAND

## COLLECTIONS IN A PERFECT BALANCE BETWEEN LUXURY AND ETHICS, CRAFTSMANSHIP SKILLS AND INNOVATION

*Newland women's and men's have an harmonic image, result of the ability to mediate between creativity and comfort, of the balance played between select fabrics and materials, and the proportions in lines. The philosophy that guides Newland is inspired by the rigor of strokes, but also of extreme innovation. Newland is a contemporary style. At the same time, sporty and elegant, where a sober luxury passes through the selection of exclusive fabrics, of a sophisticated design and a tailored construction. The collections, exclusively manufactured in Italy, respond to the image of a contemporary luxury product, which finds the perfect combination between craftsmanship and innovation, ethics and product, in an harmonious equilibrium. The main objective of the company has always been the quality of its creations. Manufacturing on a local level was the logical choice, in order to directly manage and strictly control the final product: an impeccable standard and correct ethical behavior. Comfort and wellness are also key elements in the Newland philosophy.*

*It is from the choice of high-tech fabrics, directly produced and from the experience of italian tailoring that its sporty luxury style originates, dedicated to extreme sport as well as to everyday life.*

## KNOW-HOW

*Athesis has created for Newland an entire set of highly technological fabrics, whose flagship is made by the DHtech set, which uses the best polypropylene microfiber to get performing items both from a technical standpoint as from comfort, opening up new perspectives in the sportswear market.*

*In high rates the polypropylene ensures thermoregulation, thermal insulation, lightness and breathability, ensuring a delightful sensation of dry and warm in any weather condition. Moreover the polypropylene is hypoallergenic and bacterial-static, and so particularly indicated for people who suffer allergies, or have a sensible skin and it forbids the making of odors.*

*It 'also an environmentally friendly material that does not use water during dyeing, thus avoiding the harmful wastewater discharge and is completely recyclable.*

*The great experience gathered and the continuous researches to maximize the possibilities of this material, have allowed, moreover, the customization with almost no limits of proposed weights; a very long processing and by a high rate of craftsmanship, which had to rely on a modified technology to knead in Jacquard a material that has never been used in this way.*

*All garments from the collection Newland have the advantage of being studied in detail and provide its users quality made in Italy, comfort and high performance.*

**NEWLAND**  
SPORT AND LIFESTYLE

## GENERAL TECHNICAL FEATURES

- *High breathability*
- *thermal insulation*
- *thermoregulation*
- *consistency*
- *lightness*
- *bacterial-static properties*
- *hypoallergenicity*
- *water-repellency*
- *resistance to dirt and break up*
- *comfort*
- *easy care*
- *anti-stain*
- *must not be ironed*

## EASY MAINTAINANCE AND LONG-TERM RESISTANCE

*The DHtech fabrics don't bind chemically with other substances and so they are particularly resistant to dirt that doesn't enter capillary in the fibers. The colors are lasting and bright.*

*They also have a huge resistance to grazes, pilling and break up. An item made in DHtech dries quickly and it hasn't to be ironed.*

*All the DHtech fabrics are exclusive and completely produced by Athesis s.r.l. in Italy.*

## ECOLOGY

### "GREEN IS THE NEW BLACK"

*Newland has been fighting for years for a cleaner world by adopting recyclable fiber and clean energy.*

*The Newland production chain is structured to minimize waste pollution and to guarantee ethics and responsibility towards workers.*

*That's how:*

*DYEING: Our fibers are originally colored with solid additives and processed at low temperatures without solvents or acids, including at the minimum the polluting emissions and dye waste, very little water is "wasted" in the process and no harmful substance is ever released on the skin.*

*CLEAN ENERGY: we use a brand-new photovoltaic system thanks to which we perform the processing of most of our garments in our factory in Maccacari (Verona).*

*RECYCLABLE YARNS: our yarns are fully recyclable.*

*SUSTAINABLE PACKAGING: we have decided to abandon the common plastic bags to protect our garments, in favor of biodegradable bags.*

*0 KM ITALIAN PRODUCTION: we produce in our factory or avail of partners from our territory, where stringent rules for the protection of workers are in force.*

*"Buy less, choose well, make it last"*

*Our range offers non-deformable, hypo-allergenic knitwear fabrics and resistant colors: more quality, less waste.*

*BE CONSCIOUS, BE COOL*

## DHTECH 240

It is the thinnest of DHtech set. It's the perfect fabric to realize a technical underwear or very light and very performant second layers, that's why such a wide range of use. The special working of the garments magnifies the stretch characteristic of the material making it a valuable insulating and thermoregulating tool to wear in contact with skin or on a PP first layer. It's also perfect in combination with a full zip sweatshirt in DHtech 400 to enhance its insulating power and face any challenge in cold conditions. A big plus of this knitted fabric is the possibility to work it in jacquard way, creating garments of taste from time to time innovative or traditional but in each case unique for performance.

65%PP - 33%PA - 2%EA  
Weight: 240 smq  
Temperature: -10 + 25 °C

## DHTECH 260 LIGHT PRO

The DHtech 260 light PRO fabric is an absolute innovation in the range of DHtech fabrics. Thanks to a very new technology, two very thin layers of polypropylene are combined to allow a light and compact result, with a very high thermal insulation index in relation to the thickness of the fabric. This innovative process allows you to achieve perfect body thermoregulation, optimal thermal insulation even in harsh climate conditions and perfect breathability, to stay dry even during active sport. The touch is very soft and pleasant on the skin and guarantees users an immediate sensation of comfort and well-being. This fabric is also moderately elastic and let to develop less adherent items, to be used not only during sports performances but also as an effective ally in everyday life against cold, wind, humidity. It is a hypoallergenic, anti-odor and antibacterial fabric, very easy to maintain and ecological.

88% PP 9% PA 3% EA  
Weight: 260 smq  
Temperature: -10 + 25 °C

6

## DHTECH 300

It's a breathable, compact, lightweight and durable fabric. Extremely functional it allows, thanks to special processing of the polypropylene fibers, the optimal evaporation of the humidity produced by the body. The technical sportswear produced with DHtech 300, ensures great comfort and well-being during trainings or simple walks.

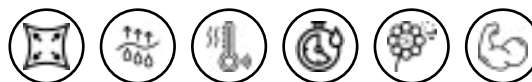

DHtech 300 in fact in contact with our skin behaves, as an extension, a protective shell that protects against harmful temperature changes or annoying blows air while the elasticity of the fabric allows a great freedom of movement.

It dries quickly keeping the body in an optimum climatic condition.

DHtech300 is the perfect fabric to realize winter second layers but it also becomes a perfect fabric for in-between seasons sweatshirts or garments for the heating phase of any sport.

65%PP - 33%PA - 2%EA  
Weight: 300 smq  
Temperature: -10 + 25 °C

## DHTECH 400

DHtech 400®, patent pending, is the more insulating DHtech fabric, it weighs 400 gr/sqm but its distinctive compactness makes it unparalleled for elasticity, comfort and fit, like a second skin. The ability to control the body temperature and the thermal insulation is at the highest levels allowing the athlete to do sports in situations of harsh climate or enjoy the outdoors, even in humidity and wind conditions. It in fact gives the best in the largest range of climates : as half zip for winter sports, in direct contact with skin or over a technical underwear; as technical sweatshirt to be worn in any condition you want, in order to avoid humidity, wind, repentine temperature changes. It is in fact able to maintain body temperature constant even in case of big temperature changes, such as the transition from a closed environment to outdoors, thus avoiding the unpleasant feeling of chills. In particular the process in "tubico" makes possible, to create an air-casing between the two layers of the weaving, that enhances the thermic insulation of the material. DHtech 400 is also unique for graphical offering of millimetric precision obtained by a skilful handwork jacquard.

65%PP - 33%PA - 2%EA  
Weight: 400 smq  
Temperature: -10 + 25 °C

## DHTECH 400 DEEP BREATH

The particular openwork weave of this special DHtech 400\*, has a breathable power doubled than the already high breathability of a traditional DHtech 400 fabric. This material allows us to create high-performance technical sweatshirts for intense active sports, consenting an instantaneous evaporation of sweat, key to the continued perception of wellbeing and dryness, and consequently, of heating during winter sports.

The fabric is also used for inserts, in garments designed to provide different degrees of protection and breathability, with the aim to ensure the maximum efficiency.

As a shell for the outdoors provides the same performance of softshell with the advantage of a better temperature-regulating capacity.

65%PP - 33%PA - 2%EA

Weight: 380 smq

Temperature: -10 + 25 °C

## DHTECH LITE XTREME

The need for lightness, warmth, performance but a comfy fit that could be worn at all times, by anyone, in any sporting or daily situation has given life to the innovative DHtech Lite Xtreme fabric. A revolutionary soft, warm and very light knitwear fabric like cashmere but easy care like the most practical of syntetic fabrics. DHtech Lite Xtreme guarantees thermal insulation, thermoregulation, optimal transpiration as well as antibacterial and hypoallergenic properties. Pure well-being. Anti-pilling, ecological fabric. Easy care.

100% PP

Weight: 380 smq

Temperature: -10 + 25 °C

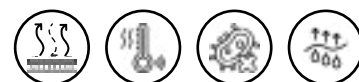

## DHTECH PURE

A 100% polypropylen knitwear dedicated to wellness in sport and leisure. Warm but thin and not bulky, this particular workmanship allows you to remain dry in any situation. Moreover, the fabric is absolutely non-allergic and antibacterial. The original designs allows you to stand out even during the sport. Dhetch Pure knitwear fabrics are thermal but lightweight, thermoregulatory and easy care.

100%PP

## DHTECH COLOR PURE

A revolutionary soft, warm and very light knitwear fabric with fashionable and detailed pictures jacquarded!

DHtech Color Pure for the first time ever combine real guarantees of thermal insulation, thermoregulation, optimal transpiration as well as antibacterial and hypoallergenic properties.

Pure well-being. Anti-pilling, ecological fabric. Easy care.

100% PP

Weight: 150 smq

Temperature: -5 + 25 °C

## DHTECH 400 NET X PRO

The revolutionary fabric DHtech NET XPRO has a complex lattice structure able to thermoregulate even more effectively. The channels of which it is composed convey moisture and let it to instantly evaporate while thermal rhomboid bridges fairly distribute the heat to the body, allowing muscles enhanced athletic performances. Since it is extremely breathable this fabric is designed for intense sports where you tend to develop elevated body temperatures, the dry feeling is total and allows the athletes to exercise safely for their own health.

65%PP - 33%PA - 2%EA  
Weight: 380 smq  
Temperature: -10 + 25 °C

## DHTECH OVALITY 3D

The latest generation Hi-tech fabric DHtech Ovality 3D is made from a dense THREE-DIMENSIONAL structure made up of ovals which determines enhanced insulation even in the event of intense cold and high humidity, while the thermal bridges developed along the grid allow rapid evaporation of the humidity. This shell has incomparable technical functions in cold climates, it is able to perfectly thermoregulate, protect against cold and humidity and thanks to the great transpiring capacity of polypropylene it allows you to stay dry during all outdoor activities.

65%PP - 33%PA - 2%EA  
Weight: 450 smq  
Temperature: -10 + 25 °C

## DHTECH FULL 3D POWER

The knitted fabric DHtech FULL 3D Power\* features an innovative structure made of a super stretch system of chambers and channels. This special texture, thanks to the three-dimensional machining of the air chambers, is capable of effectively thermoregulate the organism at the highest level, elevating its insulating power. Channels also favor a very high and fast evaporation of moisture allowing the skin to remain constantly dry and avoiding the unpleasant feeling of cold and dangerous changes in temperature. It's moreover extremely elastic and promotes all kind of unimpeded movements and, by virtue of its three-dimensionality, it provides effective protection for the most sensitive areas such as elbows and knees. High thermal insulation, breathability and extreme comfort enhanced by a trendy and unique look.

65%PP - 33%PA - 2%EA  
Weight: 430 smq  
Temperature: -10 + 25 °C

## DHTECH SOFT RELIEF

The new DHtech SOFT RELIEF jacquard knit fabric is an incredible concentrate of technicality and refinement.

Thanks to its particular relief texture, it offers warmth and thermal insulation, as well as guaranteeing maximum breathability and thermoregulation.

From this particular process, always different and sophisticated garments are born, which combine style and cutting-edge technical contents in an impeccable and original way.

The touch is particularly soft and delicate but does not require particular care for maintenance, it is in fact a total easy care like the other fabrics in the range.

DHtech Soft Relief offers the possibility of dressing in a refined way even in an outdoor context of intense cold and humidity or light rain, even in the case of active sport. It is also hypoallergenic, antibacterial and sustainable.

Loose Fitting - 100% PP  
Weight: 380 smq  
Temperature: -10 + 25 °C

## DHTECH VELOUR

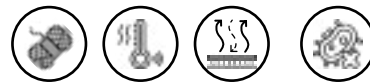

This material made of 100% polypropylene is able to combine the technical characteristics and performance of the fiber (thermal insulation, breathability, thermoregulation) to those of the heat and softness obtained thanks to a particular type of processing in jacquard.

The wearability of garments in DHtech Velour is designed for a comfortable and practical fit, not necessarily related to a use for active sports. The pleasant texture of the material, as well as a particularly refined design make it ideal for technical sweatshirts suitable for leisure as replacements of fleece. The absence of elastane allows us to create garments not close-fitting for a casual look, perfect to be worn over a DHtech 240 or a DHtech 400 according to climatic conditions.

The material is absolutely fluff, dirt-resistant and abrasion, is not subject to dimensional change. The color fastness is absolute and does not vary over time. Easy maintenance: washing 30 ° C.

Loose Fitting - 100% PP  
Weight: 380 smq  
Temperature: -10 + 25 °C

## MERINTECH

The range of MERINTECH knitted fabrics arises from a combination of the best polypropylene microfiber and 100% extra-fine Merino present on market.

The combination of these two materials perfectly join the irreplaceable features of the most valuable wool to the unquestioned innovation brought by the most revolutionary of the synthetic fibers.

The polypropylene in contact with skin provides temperature control, thermal insulation, lightness and breathability fostering the moisture evaporation and ensuring a pleasant feeling of warmth in any weather situation.

Polypropylene is also bacteriostatic and hypoallergenic, and then allows to wear beautiful clothes of wool to people who normally can not because of allergic or with sensitive skin. Merino wool is an extremely valuable material, soft and insulating. Worked with polypropylene becomes absolutely no-pilling and easy to maintain.

It is the most insulating of the category but equally slim and compact. We can work it with special structures 3D or jacquarded.
